

Machine tools

The complete machine
range for turning, milling
and grinding

Model range

Tradition in Mechanical Engineering

www.spinner.eu.com
sales@spinner.eu.com

4

PD series:

Ultra-Precision Lathe for micro-finishing and hard-turning

6

Microturn:

Turning-Milling Centre for complete precision machining AND micro-finishing

8

Microturn Grind:

Hard-turning and Grinding centre for micro-finishing

10

TC series:

Powerful Universal Lathe for high cutting performance

12

TTS series:

High Productive Turning Centre for simultaneous machining with up to four turrets

14

U-Compact-Line series:

Travelling-Column Machining Centre with 3, 4 or 5-axes-machining, the entry-level to the superior milling class

16

U-Advanced series:

Travelling-Column Machining Centre with up to 5 axes, for high-end applications in the 5-axes simultaneous machining and the series production

18

VC-3A series:

High-Speed Machining Centre for demanding tasks in the workshop and in tool and mould making

20

VC850-4A/5A series:

Ultra compact 4-/5-axes machining centre

22

VC1650-5A series:

5-Axes Precision Machining Centre for large workpieces

24

Bar feeders:

Specially for SPINNER CNC-Lathes designed bar-loading system

25

Robobox:

Flexible, low-cost automation

26

Automation:

Integrated standard solutions with robot or individual solution, ALL FROM ONE SOURCE

We have been perfecting and improving our machine tools for more than 70 years. Today, more than 600 employees in the SPINNER GROUP complete more than 1,000 machine tools each year. SPINNER machines are successfully being used in more than 60 countries of the world.

In order to satisfy your requirements, we offer a wide range of Turning Machine and Machining Centre products. Tens of thousands of customers throughout the world trust in our CNC machine tools.

Our machine tools are always used where a particular demand in precision and reliability is required. Innovation and practical solutions in detail are guaranteed by our extensive construction department. We manufacture all important components and assemblies ourselves in our production plants in order to be able to supply you with machine beds, guideways, spindles and turrets that are perfectly matched to one-another.

Our machine tools are sophisticated seriesbuilt products manufactured at a high level. High precision standards in all areas of the production and assembly ensure for the optimum constant quality of our products. Each machine is subjected to a strict final inspection of all parameters.

We supply turnkey projects with automation for large-scale production. In order to ensure that the use of our machine tools is successful, we offer training courses for the operation, programming and maintenance of our systems.

Our service hotline deals with technical queries concerning the programming and repair of your SPINNER machine tools at any time and at short notice.

Place your trust in our products as well and let us know what we can do for you.

Turning

Milling

Grinding

Automation

PD

SPINNER
PD-CNC

Micro-finishing and diamond turning
Hard turning > 60 HRC
Perfect surface finishing

Ultra Precision Lathes

- Most compact dimensions among precision turning machines
- Hardened and ground precision sliding guideways with high vibration damping
- 0,1 μm resolution linear scales
- Micro-turning in sub μm -range
- The most precise spindles on the market with roundness < 0,1 μm
- Best slide positioning repeatability
- High accuracy process reliability

Turret and sub spindle

Turret and tailstock

Linear tooling

Optimal geometric tolerances
Precise clamping devices
Made in Germany

For Micro-finishing and Hard-turning

Wide range of standardized auto-loading available by robots or special made solutions according to customers workpieces, or bar feeder

Part catcher

Model sizes

	Collets/Chucks	Max. workpiece sizes
PD32	32/125 mm	Ø ~120 x 250 mm
PD42	42/140 mm	Ø ~120 x 250 mm

Microturn

Micro-finishing
Hard-turning
Universal machining

Turning-Milling Centre for complete machining

- In X 600mm and Z 350mm moveable spindles for high rigid and optimised positioning $< 1 \mu\text{m}$
- Direct measurement system for all axes
- Static linear table for standard linear tooling or special tools
- High precision motor spindles "Made by SPINNER"
- High-precision hard-turning

Linear tooling system for micro-finishing in combination with turret and Y axis for universal machining.

Expandable to a 5-axes Turning-Milling centre for machining all 6 workpiece sides.

Version mit subspindle and B-axis (LTBS-version)

Microturn

With Y axis

With B axis and milling spindle

Available with sub-spindle

AND micro-finishing

L-Version

Spindle with high precision positioning in X1/Z1 and linear tooling as optimal rigid hard-turning and micro-finishing machine

LT-Version

With additional turret with driven tools and Y1 axis in the lower part of the workspace

LTB-Version

With additional milling spindle with Y2 and B axis in the upper part of the workspace and with tool magazine up to 72 tools

LTBS-Version

With two spindles on symmetrically positioned slides X2/Z2, also for simultaneous machining with sub-spindle (see picture on page 6 below)

Unique combination of universal soft machining up to 5-axes Turning-Milling AND high-precision hard-turning machine in a single machine concept.

Strokes

	X-axis	Y-axis	Z-axis	B-axis	Turret
L-Version	600 mm	-	350 mm	-	-
LT-Version	600 mm	+/- 50 mm	350 mm	-	12 x BMT45
LTB(S)-Version	600 mm	+/- 50 mm	350 mm	+/- 180°	12 x BMT45

Microturn Grind

Hard-turning

External cylindrical grinding

Internal cylindrical grinding

Hard-turning and Grinding centre for micro-finishing

Unique combination of universal soft and hard-turning offering the possibilities of both an external and internal cylindrical grinding machine.

The picture opposite shows the Microturn Grind as a double spindle machine with transfer from spindle 1 to spindle 2 and simultaneous machining on both sides. Also available as a single-spindle machine. Also available with automation.

Sample workpiece

- Partial or pre-machining by hard-turning
- Shortened grinding time thanks to pre-machining with minimum stock oversize allowance
- Automatic dressing functions for grinding wheels
- Extensive grinding cycles programmed in the dialog
- Complete machining using both technologies in one operation

Hard-turning operation on left-hand workpiece spindle
Simultaneous internal grinding operation on right-hand spindle

Microturn Grind

with main and sub spindle
with large grinding wheel
on both spindles

Single spindle or two spindles

External grinding with powerful grinding spindle in angular plunge-cut, also suitable for face grinding of shoulders.

With integrated automatic balancing unit and CNC dressing device.

Also for polygon grinding of out-of-round contours.

Up to two high-performance internal grinding spindles up to 90,000 rpm with alignment to the left or right spindle as desired.

Enormous reductions in internal grinding times are achieved by pre-turning to a minimum stock oversize allowance.

	Microturn Grind 1 spindle	Microturn Grind 2 spindles
Number of spindles	1	2
Grinding wheel outer diameter	400 mm	400 mm
Typical max. workpiece size	D120 x L120 mm	D120 x L120 mm
Number of turret stations	12 x BMT45	12 x BMT45

TC

Universal
Stable
Compact

Powerful Universal Lathes

■ Hardened and ground sliding guideways for best vibration damping

- Solid sliding guideways with high damping
- Monoblock rigid casting design of machine body
- Tailstock or sub spindle
- Optional Y axis and driven tools
- Modern motor spindles (up to 85 mm)
- Gearboxes for high torques (from 110 mm)
- Latest control system Siemens 840D or Fanuc 32i

Available with automation

Turret VDI50
of TC800-MC

Powerful
Highly dynamic
Highly productive

Simultaneous machining from bar material or with automation

TTS 42/65

TS: One turret at the top

TTS-Duplex: Two turrets top/bottom

TTS-Twin: Two turrets at the top

- THE productive turning solution for bar machining or with automation
- Reduction of cycle time by simultaneous operations with up to 4 turrets
- Two Y-axes in the TRIPLEX-Version and QUADREX-Version
- Each turret can work either on the main spindle or on the sub spindle
- Increased cutting performance by integrated passive vibration damping
- Perfect covers for guideways
- Integrated motor spindles with water cooling
- Spindle bore 42/65/85/125 mm
- Chips falling perfectly straight downward
- Rigid turret "Made by SPINNER" with high-precision toolholders BMT

Optional steady rest

Passive structure damping
Increased cutting performance
Made in Germany

For complex turning AND milling parts

TTS 85/125

TTS-Triplex: Three turrets

TTS-Quadrex: Four turrets

TTS-Quadrex

Top model with four simultaneously operating turrets for high productivity in both bar and chuck machining.

U-Compact

Universal
Compact
Affordable

Universal Machining Centre

U630 Compact available in 3 configurations

- U3-630 Compact:
3-axes-version with fixed table
- U4-630 Compact:
4-axes-version with large rotary table
- U5-630 Compact:
5-axes-version with integrated rotary/tilting table

With Siemens 840D-SL

- Large X stroke with 630 mm or 1530 mm
- Both side bearing for tilting-axis
- THE entry-level machine for 5-axes machining

U-Compact

Dynamic
Optimal access
Flexible use

The entry-level machine for 5-axes machining

U1530 Compact available in 3 configurations

- U3-1530 Compact: 3-axes-version with large fixed table
- U4-1530 Compact: 4-axes-version with large rotary table and fixed table on left side in the working area
- U5-1530 Compact: 5-axes-version with integrated rotary/tilting table and fixed table on left side in the working area

Strokes

	X axis	Y axis	Z axis	B axis
U630	630 mm	530 mm	465 mm	+110°/-90°
U1530	1530 mm	530 mm	465 mm	+110°/-90°

Professional 5-axes machining
Highly dynamic
Compact and sealed

Travelling-Column Machining Centre

U1530 available in 3 configurations

- U3-1530: 3-axes-version with large fixed table
- U4-1530: 4-axes-version with large rotary table and fixed table on left side in the working area
- U5-1530: 5-axes-version with integrated rotary/tilting table and fixed table on left side in the working area

U5-1530 with Siemens 840D-SL and 24-inch Touch panel

- With high-precision rotary/tilting tables available with weight compensation
- Extendable up to 122 tools
- Available with pallet changer
- Most modern control systems: Siemens 840D-SL or Heidenhain TNC640
- With most modern digital drives
- Spindle speeds up to 20.000 rpm

Machining example U4 und U5

U-Advanced

Optimal accuracy

For tool making and mass producer

Optimal ergonomics

For High-End applications

U630 available in 3 configurations

- U3-630: 3-axes-version with fixed table
- U4-630: 4-axes-version with large rotary table
- U5-630: 5-axes-version with integrated rotary/tilting table

U5-630 with Heidenhain TNC640

Dynamic
Ergonomic

5-Axes High-Precision Machining Centre

- New and patent-registered guideway cover concept
- Ideal for heavy workpieces
- Additional fixed table for 3-axes machining
- Optimal chip disposal by means of 4 worm conveyors
- Up to 138 tools in the tool magazine

Ergonomic
operating panel
adjustable in
height and angle

VC1650-5A

Compact
Large workspace
Made in Germany

For large workpieces

- Additional fixed table on the right side in the workspace
- Small distance to the working table

Strokes

	X axis	Y axis	Z axis	Pivot axis B in the milling head
VC1650-5A	1650 mm	820 mm	820 mm	-1° / +110°

Bar feeder

Compact
Fast
Affordable

Short bar feeders

■ CNC-servo axis for smooth move of the bar

■ For material up to 1200 mm

■ Max. bar diameter 80 mm / 110 mm / 125 mm

	Servo 80-1500	Servo 110-1500
Max. bar length	1500 mm	1500 mm
Bar diameter	6-80 mm	8-110 mm

Compact
Affordable
Made in Germany

- Available for almost all SPINNER machines
- Suitable for loading lathes and machining centres
- Can be flexibly positioned as a BOX in front of or next to the machine
- Safely closed for temporary manual operation

- 5 storage drawers
- For workpieces weighing up to 2 x 4 kg or, respectively, 8 kgs
- Programmed in dialog via masks without special knowledge
- Everything from a single source: SPINNER
